- Android Minimum Version: 7.1, SDK: 25
- IOS Minimum Version: 12

Newer models of the listed devices and Smart TVs equipped with Amazon, Roku and/or Apple TV software may work in most cases but are not guaranteed. In addition, televisions with Fire TV and Roku built-in have not been tested for this service, due to too many makers and models. Some of these TVs have been known to work, but they tend to perform slower than external devices. Emergency Alert System (EAS) delivery is supported on most Amazon and Apple TV devices, but EAS and Caller ID are not guaranteed on streaming devices. A streaming STB that provides both EAS and Caller ID is available for \$5 per month.
