- Ultra 4800

Handheld Devices

- Android Minimum Version: 7.1, SDK: 25
- IOS Minimum Version: 12

Newer models of the listed devices and Smart TVs equipped with Amazon, Roku, and/or Apple TV software may work in most cases but are not guaranteed. Specifically, the Fire TV Stick HD and Fire TV Stick 4K Select are not currently supported. Additionally, televisions with Fire TV and Roku built-in have not been tested for this service due to the wide variety of makers and models. While some of these TVs have been known to work, they often perform slower than external devices. Emergency Alert System (EAS) delivery is supported on most Amazon and Apple TV devices; however, EAS is not guaranteed on streaming devices.
